# W-VALLEY

W-Valley flashing is a beneficial component of many residential roof applications. The center crimp of a Metal Sales valley flashing helps relieve stress so that the metal does not buckle or crack, providing long-lasting strength at a critical point while effectively channeling rainwater. Hems and beads can also be added to increase strength and safety while handling the W-Valley prior to and during application.

## W-VALLEY

Item #	Description
49990XX	14" Wide Steel
49991XX	16" Wide Steel
49992XX	18" Wide Steel

**COLOR CHOICES:** Steel: White (39), Earth Brown (43), Black (06) or Terratone Bronze (62).

**Other colors available. Please call for details.**

Skid Packaged

\*50 piece minimum order on all W-Valley.

# ROOF EDGE

Metal Sales roof edge flashing helps channel water away from the roof edge, offering protection from leaking and pooling. When water is present from rain, snow, or ice, roof edge ensures that water does not penetrate rafter rails, insulation, fascia, or soffits. Available in steel or aluminum in a variety of colors and styles, Metal Sales has the appropriate roof edge for any application.

# ROLL VALLEY

Roll valley can be used in roof valleys or bent as flashing to seal around chimneys. Sidewall and Endwall flashings, as well as Fascia trim, can also be formed using roll valley coil. Metal Sales roll valley is available in aluminum (economy, standard, and commercial grades), steel, and two-side stock painted aluminum trim coil.
